Tiedemann's Diving Center Advanced Specialty Program

DEEP DIVING

One of the most interesting types of diving that every diver should know about is deep diving. The skills of deep diving are important. As a diver being able to handle yourself under the effects of Nitrogen Narcosis and the time restraints of Decompression is something that you should experience.

Building experience in the area of deep diving can be invaluable to any diver. Learning to deal with the time restraints that the dive tables will place on divers will help any diver to be more comfortable and capable. You do not have to dive deep to enjoy diving. In taking this course you are simply becoming a better and more confident diver.

The **Deep Diver** program consists of one video session at Tiedemann's Diving Center and one day of diving at Dutch Springs Quarry in Pennsylvania. The lecture can be done anytime before the dives, just call the Center for an appointment. The diving for the course consists of two dives.

The total cost of the program is **\$90.00**. Each member of the class will need a full set of equipment, a pony tank set-up (which can be rented) and a tank. Members of the class will also need the SSI Specialty Diver book on Deep Diving and are responsible for Dutch Springs entrance fees and fills.

Please check our online **Calendar** for the next date this course will be held. Class size is limited so if you are interested, call us today at 516-796-6560 to hold a position in the next class for you.
